

Single SKU for the World Bands

MMFE700 M-Series are RF front-end modules designed with *WorldBand*[®] technology for high speed mobile applications covering major 5G bands. These ultra small modules integrating an advanced wide-band amplifiers, switches, bias controllers and impedance matching network which are optimized for excellent efficiency and linearity across the wide range of frequencies. MMC's signature design allows RF designers to incorporate 600MHz to 5GHz frequencies into one single global SKU reducing the size and RF complexity of mobile platforms. Its control circuitry ensures superior RF performance over wide operating ranges.

MMFE700 M-Series simplify the RF front-end design of 5G mobile devices that must operate within large number of bands (1~102).

Key Features

- 600MHz to 5GHz
- Wide-band PAs & SWs
- Single SKU
- 27dBm avg.
- 29dB Gain
- APT/ET Compatible
- 50 Ohms Internally Matched I/O
- 7 x 4 mm form factor

Applications

- Phones, Tablets
- CA for TD/FDD
- Hot Spots
- 4G/5G
